

MASTER OF OROFACIAL SCIENCES

KPT/JPS(N/724/7/0041)(MQA/PA9234)09/23

FACULTY OF
DENTISTRY

MAHSA
UNIVERSITY

"The joy of changing a person's life by creating a beautiful, healthy smile is one of the rewards of being a candidate of Master of Orofacial Sciences. It is a complex field as it is both challenging and rewarding."

- Professor Dr. Rosnah Mohd Zain
Dean, Faculty of Dentistry

The Master of Orofacial Sciences Programme bridges the Doctor of Dental Surgery and the three-year doctorate (DResDent). This one-year programme will be a pre-requisite to the first planned doctoral programme, Doctor of Restorative Dentistry (DResDent). This combination of one year Master and three years Doctoral programme will be among the qualifications required to enable graduates to be registered as dental specialists under the new Malaysian Dental Act 2018 which was recently passed by Cabinet.

This Master programme provides opportunities for local private practitioners or potential dental lecturers to specialise in an area of interest to them. The common core courses make up 50% of the programme and includes Applied Medical and Dental Sciences, Research Methodology and Biostatistics, Research Project and General Dentistry. The Restorative Dentistry module shall comprise of at least 50% of the programme.

The research project may be based on the simple collation of clinical data towards a clinical audit outcome, preliminary field studies or introductory laboratory studies. The research output can be in the form of mini-dissertations or scientific reports.

PROGRAMME STRUCTURE

1 YEAR

- Applied Medical and Dental Sciences
- Research Methodology
- Community Dental Practice
- Research Project
- Integrated Restorative Dentistry

WHY STUDY AT MAHSA

Pre requisite to a Doctoral programme to be a Dental Specialist
