ABOUT US

MAHSA Faculty of Dentistry in collaboration with EMS, offers the first unique combination of facial and dental aesthetic course. With the increase of awareness and desire for facial aesthetics, it is important for dentists to focus on facial and dental aesthetics as a whole. For comprehensive smile rehabilitation, combination of facial and dental aesthetic would create the best aesthetic outcomes. Dental professionals can make a difference in their dental practice by undergoing proper training in using botulinum toxin and dermal fillers. Expand your aesthetic dentistry practice by incorporating these facial and dental aesthetic treatments today.
