

Masterclass in Big Data Analysis

Faculty of Engineering and Information Technology

Introduction

The main purpose of the course is to give students a good understanding of data analysis with Power BI. This course includes creating visualizations and the Power BI Service.

This module introduces Power BI desktop, and explores the features that enable the rapid creation and publication of sophisticated data visualizations. With Power BI desktop you can shape and combine data with powerful, built-in tools. This module introduces the tools that are available for preparing your data, and transforming it into a form ready for reporting. This module also describes how to create and manage interactive data visualizations.

Content & Modules

Introduction to Self-Service BI Solutions
Introducing Power BI
Power BI
Shaping and Combining Data
Interactive Data Visualizations

What will you learn?

- Perform Power BI desktop data transformation
- Describe Power BI desktop modelling
- Create a Power BI desktop visualization
- Implement the Power BI service
- Connect to excel data
- Collaborate with Power BI data

Who Should Join?

The course is intended for report creators who are interested in alternative methods of presenting data.

Duration

7 Hours

Certification

Certificate of Completion by MAHSA University
