

Masterclass: **DIGITAL CURRENCY: ITS PRESENT & FUTURE**

INTRODUCTION

Digitalisation has changed everything in our lives: how we communicate, organise, interact, move and trade. Increasingly, it is also changing how we pay and potentially how we count, transfer and store value. In short, digitalisation is changing money—certainly in its role as a medium of exchange and maybe as a store of value and unit of account as well.

Despite electronic money (e-money) first appeared more than twenty years ago, their exchanges represent today still a small fraction of total financial movements. This is now changing fast, as mobile technology and the internet are joining forces to produce a silent revolution in payments. New forms of money are emerging while digital networks and platforms have the potential to transform and disrupt financial intermediation more broadly.

COURSE LEARNING OUTCOMES (CLO)

- Understand the role of money in the economy.
- Examine the viability of digital currency in changing economic landscape.
- Evaluate the viability of the digital currency for the future.

WHO CAN ATTEND THIS MASTERCLASS?

This is open to all undergraduate students.

CERTIFICATION

Certificate of Completion in Masterclass Digital Currency: It's Present and Future.
