

Masterclass in Basic MRI Interpretation

Faculty of Health and Sport Sciences

Introduction

Basic MRI interpretation is important for radiographers to expand their role to incorporate preliminary image interpretation. MRI images can be considered as a map of proton energy within tissues of the body. A variety of MRI images can be produced which emphasizes different tissue types, in particular those that contain a large amount of fat or water.

Duration

7 hours

Certification

Certificate of Completion by MAHSA University

What will you learn?

- Introduction to MRI
- MRI sequences and protocols
- Interpretation of MRI images

Content

Fundamentals of MRI

MRI Sequences

MRI Protocols

MRI appearances

Who Should Attend?

This Masterclass in Basic MRI Interpretation is designed for Medical Imaging students and radiographers or other healthcare practitioners to gain additional knowledge in MRI interpretation.

Fee

MAHSA Students
RM 280

Public Participants
RM 350

1800-88-0300

+603 - 5102 2200
