

# Masterclass in Forensic Radiography

Faculty of Health and Sport Sciences

## Introduction

Forensic radiography is an application of scientific methods and radiographic techniques to investigate crime. It comprises the performance, interpretation and reportage of the radiological examinations and procedures which are needed in court procedures or law enforcement. Radiological methods are widely used in identification, age estimation and establishing cause of death.

## Duration

7 hours

## Certification

Certificate of Completion by MAHSA University

## What will you learn?

- Forensic Radiography which include the modalities and image application

## Content

Terminology & Purpose of Forensic Radiography
Imaging modalities used in Forensic Radiography
Forensic Image Application
Practical demonstration

## Who Should Attend?

This master class in Forensic Radiography is designed for Medical Imaging and other students interested to gain knowledge on imaging application in forensics.

## Fee

MAHSA Students  
**RM 280**

Public Participants  
**RM 350**
